

Press Release – Örnsköldsvik, Sweden, December 10:th 2004

Clavister announced as winner of the prestigious IDG Network & Communication Firewall Test

For the fourth consecutive year, Clavister was declared winner of the annual IDG - Network & Communication Firewall test (in Scandinavia). Clavister defended it's outstanding track record and extended its lead against other firewall vendors such Juniper / Netscreen, Checkpoint, Fortinet and others.

This year IDG – Network & Communication focused the test on performance and management capabilities and Clavister's SG 4230 firewall/VPN appliance was rewarded, with honors, the highest score possible.

"A fantastic result by Clavister - with extremely good performance in all parts of the test there is no other possible score than 5 out of 5", comments Fredrik Bernsel, Chief Editor at IDG – Network & Communications.

"We are honored to receive this prestigious award, for the fourth consecutive year and it also confirms the excellence of our technology which more and more clients are benefiting from", says Peter Johansson, President and CEO at Clavister.

"The test result supports the case that Clavister has become a serious player that is able to outperform the competition in all aspects. Clavister's X-pansion concept, for example, offers a cost efficient way to grow with our customer's security needs " concludes Raoul Shabastari, Vice President of Sales at Clavister.
