Clavister Secures Indian Media House Color Chips India

Clavister Premium Reseller in India, Zoom Technologies delivered high security and reliance to guarantee project delivery for Color Chips worldwide projects. Supporting up to 4000 concurrent connections, the solution gives Color Chips India room to grow, in any dimension.

Whether it is 2D or 3D animation, or game development, Color Chips is well equipped for the job. Based in Hyderabad, India with offices in Mumbai and Delhi, as well as offices in Australia, UK and France, Color Chips delivers result all across the international market.

With the growing globalization and increasing customer base, Color Chips needed a secure solution to be able to offer its customers an easy and secure way of delivering projects.

Corporate Background

Color Chips is an integrated design solutions company. From animation and Web design to identity development, Color Chips is equipped to fulfill corporate communication needs across all digital media.

Faced with growing needs to deliver completed projects through the Internet, Color Chips contacted Clavister Premium Partner Zoom Technologies to investigate how to make Internet access a secure and reliable vehicle for project deliverance to and from customers, and at the same time make it easy to use and cost effective.

Solutions

Zoom Technologies started with an assessment of the current network topology and work practices. Mr. Noble at Zoom Technologies explains; "We conducted a detailed study of

Color Chips network and the requirements that they had, to be able to get the right products and technology in place". The result was an efficient and effective solution based on

Clavister Security Gateways providing up to 4000 concurrent connections.

Mr. Noble continues; "The customer was also interested in utilizing the bandwidth management features to enable customers guaranteed premium access at all times". It was also important to employ Clavister Security Gateways built-in URL filtering techniques to restricting internal employee's access to unproductive sites.

Conclusion

Color Chips India is offering a full package of services; 2D and 3D animation, game development and Web design. Now they can communicate with clients around the world in a secure and reliable way, and concentrate on getting the project delivered. The Clavister Security Gateway solution brings them

"The product reliability and Clavister's reputation in the market space were key factors for Color Chips India."

Mr. Noble – CEO – Zoom Technologies

the confidence and security they need, as well as guaranteed premium access for their customers. They also opted to use URL filtering to curb employee accidentally surfing to malicious and unproductive Web sites.

"The Clavister package came with all the right features for us" says Mr. Sudhish S. Ramabhotla, Chairman and Managing Director at Color Chips India. He continues; "We were also pleasantly surprised how easy the solution is managed".

Color Chips India achieved an environment allowing customers and staff to access information in a secure way, from anywhere in the world.

ABOUT COLOR CHIPS INDIA LIMITED

Color Chips is an integrated design solutions company. The team of professionals working at Color Chips are dedicated to creating powerful, high quality products. Color Chips is located in Hyderabad, the center of the Information Technology and Entertainment business in India. Hyderabad is also the home of the largest film production studio in Asia and Microsoft's Software Development Center, the only one outside Seattle. This was one of the factors that helped Color Chips in accessing talented human resources from across the country.

About Clavister

Clavister - a Swedish privately owned company developing IT security products, including its award-winning Clavister Security Services Platform (SSP™). This service-oriented framework enables organizations to monitor network traffic, protecting critical business assets and blocking undesirable surfing. It will also protect you against intrusion, viruses, worms, Trojans, and overload attacks. It requires minimal servicing, with central administration, and has exceptionally flexible configuration possibilities. Its seamless scalability makes it easy to provision the perfect solution for any customer; be it small organizations, large Internet Service Providers, Managed Security Service Providers, or multimedia-ready telecom operators.

Clavister was founded 1997 in Sweden, with R&D and headquarters based in Örnsköldsvik and Sales and Marketing based in Stockholm. Its solutions are marketed and sold through International sales offices, distributors, and resellers throughout EMEA and Asia. Clavister also offers its technology to OEM manufacturers.
