Clavister InSight™ Supported Devices

Overview

Clavister InSight™ is an award-winning, easy-to-use Security Information and Event Management (SIEM) solution that provides essential real-time security intelligence to help decipher hacker/virus behavior, combat security threats and meet regulatory compliance requirements across the entire IT infrastructure.

Apart from supporting the Clavister Security Gateway product series, Clavister InSight™ support a large number of third-party devices. The supported products are listed below.
